

Saving Life's Life

What is Saving Life's Life?

Saving Life's Life is a business operation that takes second-hand wooden furniture, and transforms it into a newly upcycled piece. It's a project whose foundation was created on the values of sustainability, ethical relationships, and customer satisfaction. We are a company that combats tree felling and benefits the community that we work in. We strive to integrate sustainability into the community around us by evolving it to fit into our day to day lives. We aim to reach for environmentally aware people who want to make a difference in the world.

The Tree of Life is our motivation for creating this business, as it is a symbol of individuality and strength. All trees begin life in the same way, yet as they grow older, they weather nature's forces and develop into their own unique and beautiful ways. This is represented in our business, as it shows that we can create something new and beautiful with resources readily available.

To further promote sustainability, our business promises to donate 10% of our profits in school materials in order to integrate sustainability into education and young children's day to day lives, along with an additional 15% towards planting new trees.

Our Mission

We are committed to fostering a sustainable future and improving the social, economic, and environmental well-being of the community. We are dedicated to environmental improvements that cultivate a sustainable future, by emphasizing the utilization of wood recycling for current and future generations.

Our Team

Gisselle Araujo, University of Houston, 2023

Rucha Batchu, Case Western Reserve University, 2024

Christina James, Old Dominion University, 2024

Gabriella Ramos, Our Lady of the Lake University, 2022
