

EcoScholar

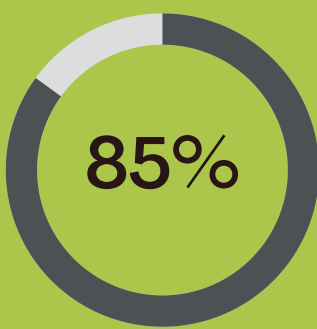

Our Mission

Eco Scholar is on a mission to reduce E-waste while bridging the gap to quality education through sustainable STEM kits.

Our range of digital and physical STEM kits combines education with play through sustainable practices. We make education interactive, eco-friendly and simple to use. We impact the world one kit at a time.

E-Waste

E-waste comprises 70% of our overall toxic waste. Only 12.5% of E-Waste is recycled. 85% of our E-Waste are sent to landfills and incinerators are mostly burned, and release harmful toxins in the air!

Inequity of Education

More than 50% of young people in 65 out of 115 countries have not completed upper secondary school. Roughly 20% of children around the world don't attend school. And is increasing due to the pandemic.

Education Tool

Significantly more—1,327 ed-tech tools—were accessed on average each month after the coronavirus-related closures. That's a nearly 90 percent increase over the previous monthly average for the 2018-2019 academic year, when just 703, were accessed.

What is EcoScholar

- A business that brings equitable education within the community in an eco-friendly manner.
- A business that reuses technology parts and turns them into kits (3-14yrs)
- A business that offers educational platform/curriculum (scratch)
- A business that kickstarts brand products.
- A business that teaches sustainable practices.
- A business that builds community and partners with sustainable companies.

Our Team

- Abidemi Awojuyigbe, Prairie View A&M University, Junior
- Brian Liu, University of Houston, Master
- HemanshuMirchandani, University of Houston, Junior
- Kimberly Santos, University of Houston, Junior
- Zahara Ali, University of Minnesota-Twin Cities, Junior
